Author Index

BB – Book in Brief
BR – Book Review
L – Letter to the Editor

A

Albin, R. L., Young, A. B. and Penney, J. B., The functional anatomy of basal ganglia disorders 366
Aldrich, R. W., *Microelectrode Techniques: The Plymouth Workshop Handbook* 39 (BR)
Allman, J. M., see Mora, B. N.
Anderson, D. J., New roles for PDGF and CNTF in controlling the timing of glial cell differentiation in the optic nerve 83
Andreoli, V., see Cantoni, G. L.
Anholt, R. R. H., *Molecular Neurobiology of the Olfactory System: Molecular, Membranous, and Cytological Studies* 122 (BB)
Armstrong, D. L., Calcium channel regulation by calcineurin, a Ca^{2+}-activated phosphatase in mammalian brain 117
Athayde, C. M., see Knight, D. E.

B

Baas, P. W., see Black, M. M.
Barker, R., Environmental toxins and Parkinson's disease 182 (L)
Barnes, D., see McDonald, W. I.
Barnstable, C. J., see Naegele, J. R.
Bean, B., More than a Ca^{2+} channel? 128
Bellugi, U., Poizner, H. and Klima, E. S., Language, modality and the brain 380
Benson, M. D., Familial amyloidotic polyneuropathy 88
Benson, M. D., Reply to Haan, Roos and van Duinen 256 (L)
Berg, D. K., Boyd, R. T., Halvorsen, S. W., Higgins, L. S., Jacob, M. H. and Margiotta, J. F., Regulating the number and function of neuronal acetylcholine receptors 16
Black, M. M. and Baas, P. W., The basis of polarity in neurons 211
Blake, R., *Spatial Vision* 230 (BR)
Blaser, P., see Clarke, P. G. H.
Bolton, T. B., *Noradrenergic Innervation of Blood Vessels (Vol. 1: Putative Neurotransmitters. Vol. 2: Regional Innervation)* 307 (BR)
Bolz, J., Gilbert, C. D. and Wiesel, T. N., Pharmacological analysis of cortical circuitry 292
Bonner, T. I., The molecular basis of muscarinic receptor diversity 148
Borst, A. and Egelhaaf, M., Principles of visual motion detection 297
Bower, J. M., see Haberly, L. B.
Boyd, R. T., see Berg, D. K.
Brehm, P., Resolving the structural basis for developmental changes in muscle ACh receptor function: it takes nerve 174
Bronner-Fraser, M., *The Neural Crest* 359 (BR)
Burmeister, D. W., see Goldberg, D. J.
Butcher, L. L. and Semba, K., Reassessing the cholinergic basal forebrain: nomenclature schemata and concepts 483
Butterworth, R. F., *The Wernicke–Korsakoff Syndrome and Related Neurologic Disorders due to Alcoholism and Malnutrition* 523 (BB)
Byerley, W., Mellon, C., O'Connell, P., Lalouel, J-M., Nakamura, Y., Leppert, M. and White, R., Mapping genes for manic-depression and schizophrenia with DNA markers 46

C

Cain, D. P., Long-term potentiation and kindling: how similar are the mechanisms? 6
Cantoni, G. L., Mudd, S. H. and Andreoli, V., Affective disorders and *S*-adenosylmethionine: a new hypothesis 319
Capaday, C., see Stein, R. B.
Carew, T. J., Developmental assembly of learning in *Aplysia* 389
Carlson, G. A., see Westaway, D. A.
Carman, G. J., see Mora, B. N.
Castle, N. A., Haylett, D. G. and Jenkinson, D. H., Toxins in the characterization of potassium channels 59
Catsicas, S., see Clarke, P. G. H.
Charlton, H. M., *Cell Surface Antigen Thy-1: Immunology, Neurology and Therapeutic Applications* 413 (BR)
Chiquet, M., Neurite growth inhibition by CNS myelin proteins: a mechanism to confine fiber tracts? 1
Clarke, J., *Current Issues in Neural Regeneration Research (Neurology and Neurobiology, Vol. 48)* 309 (BB)
Clarke, P. G. H., Blaser, P. and Catsicas, S., Neurotrophic theory 494 (L)
Collewijn, H., *Movements of the Eyes* 360 (BR)
Cordo, P. J. and Flanders, M., Sensory control of target acquisition 110
Crawley, J. N. and Wenk, G. L., Co-existence of galanin and acetylcholine: is galanin involved in memory processes and dementia? 278
Crick, F., Neural Edelmanism 240
Curran, T., see Morgan, J. I.

D

Dale, N., *Neuronal and Cellular Oscillators (Cellular Clocks Series, Vol. 2)* 521 (BR)
Dani, J. A., Site-directed mutagenesis and single-channel currents define the ionic channel of the nicotinic acetylcholine receptor 125
Davies, P. T. G., *Basic Mechanisms of Headache (Pain Research and Clinical Management Vol. 2)* 523 (BB)
Dean, P., Redgrave, P. and Westby, G. W. M., Event or emergency? Two response systems in the mammalian superior colliculus 137
Dehay, C., *Dahlem Workshop Report: Neurobiology of Neocortex* 271 (BR)
Dickson, G., see Walsh, F. S.
Dragunow, M., GABA and seizure initiation *in vivo* 10 (L)
Dubbeldam, J. L., The role of muscle spindles: a functional-morphological view 93 (L)
van Duinen, S. G., see Haan, J.
Dunnett, S. and Isacson, O., Trophic mechanisms are not enough 257 (L)

E

Edgar, D., Neuronal laminin receptors 248
Egelhaaf, M., see Borst, A.
Egger, M. D., The development of confocal microscopy 11 (L)
Einon, G., *Archivist* 232 (BR)

F

Fambrough, D., *The Na^+, K^+-pump Part A: Molecular Aspects (Progress in Clinical and Biological Research, Vol. 268A)* 361 (BB)
Farah, M. J., The neural basis of mental imagery 395
Fitzgerald, M., Arthritis and the nervous system 86
Flanders, M., see Cordo, P. J.
Forscher, P., Calcium and polyphosphoinositide control of cytoskeletal dynamics 468
Fritzsch, B., *The Forebrain of Reptiles: Current Concepts of Structure and Function* 272 (BB)

G

Gilbert, C. D., see Bolz, J.
Gilula, N. B., see Guthrie, S. C.
Goldberg, D. J. and Burmeister, D. W., Looking into growth cones 503
Gordon-Weeks, P. R., Gap-43 – What does it do in the growth cone? 363
Gordon-Weeks, P. R., Growth at the growth cone 238
von Grafenstein, H., see Knight, D. E.
Green, D. P. L., What causes membrane fusion in exocytosis? 285 (L)
Greene, L. A., A new neuronal intermediate filament protein 228

Subject Index

A

A-CAM, see N-cadherin
Acetylcholine (ACh)
  and AChRs 4
  action with galanin 279
  action in the thalamus 217
  and kindling 7
  and neuronal outgrowth 265
Acetylcholine receptors (AChRs)
  and cAMP 19
  and disorders of neuromuscular transmission 497
  molecular biology of 148
  muscarinic 7, 151
  nicotinic 3, 16
  site-directed mutagenesis of 125
  subunits of 125, 174
N-Acetyl-glucosamine (GalNAc)
  in GABAergic identification 31
ACh, see acetylcholine
AChRs, see acetylcholine receptors
Actin 468, 503
Actin-binding proteins 468
α-Actinin
  EF-hand family 465
S-Adenosyl-L-methionine 319
Adenylate cyclase
  in the study of olfaction 35
Adomet, see *S*-adenosyl-L-methionine
Adrenergic receptors
  antagonists of and pain 86
Affective behaviour
  and cardiovascular control 506
Affective disorders
  and AdoMet 319
  and barinine 319
Afferents
  rapidly adapting (RA) 514
  slowly adapting (SA) 514
Alpha cells, see Y-cells
Alzheimer's disease
  and β(A_4)-amyloid protein 131
  and FAP 134
  molecular genetics of 152
  and prealbumin (transthyretin) 134
Amino acids
  excitatory 349
γ-Amino butyric acid (GABA)
  and seizure initiation 10 (L)
  and visual cortex 293
Amphotropic viruses 26
Amygdala
  and cardiovascular control 506
  and kindling 6
β-Amyloid precursor protein (β-APP, A_4 protein)
  and FAP 88, 256 (L)
  and AD 131, 152, 224
Animal behaviour 360 (BR)
ANP, see atrial natriuretic peptide
Antennapedia 208
Apamin
  and Ca^{2+} channels 421
  and K^+ channels 59
Apolipoprotein D 37
β-APP, see β-amyloid precursor protein
Archivist 232 (BR)
Arthritis
  experimentally inducible (EIA) 86
  rheumatoid (RA) 86
Association fibres
  in the piriform cortex 260
Associative memory, see memory, associative
Astrocytes
  lineage of 25
  types of 83
Atrial natriuretic peptide (ANP)
  and FAP 88
Auditory system 273 (BR)
Autoimmunity 498
Autoproteolysis
  and Ca^{2+} 439
Axonal transport, see transport, axonal
Axons
  differentiation of 203, 211
  and growth cones 238
  see also neurites

B

B-50, see GAP-43
Barinine, see affective disorders
Barium (Ba^{2+})
  and exocytosis 452
Baroreceptor reflex 508
Barrels
  and cortical development 74
Basal forebrain nomenclature 483
Basal ganglia
  and PD 285 (L)
Basket cells 28
Becker muscular dystrophy (BMD), see muscular dystrophy
Beta cells, see X-cells
α-BGTx, see α-bungarotoxin
Blood vessels
  innervation of 307
Borrelia burgdorferi, see Lyme disease
Bovine spongiform encephalopathy (BSE) 226
  see also prions
bride of sevenless (boss) gene
  and ommatidial development 105, 187
α-Bungarotoxin (α-BGTx) 5

C

Caged compounds
  DM-nitrophen 56
  and flash photolysis 54
  nitr-5 56
Ca^{2+}, see calcium
Ca^{2+}/CaM-dependent protein kinase (CaM kinase II) 448
Ca^{2+}-dependent ion channels
  and AChRs 151
  physiological role of 420
  and toxins 59
Calbindin
  EF-hand family 465
  in GABAergic neurons 30
Calcineurin
  and Ca^{2+} channels 117
  EF-hand family 464
Calcium (Ca^{2+})
  and axonal transport 474
  and calmodulin 433
  and the calpains 438
  and cytoskeleton 468
  -dependent channels 420
  and exocytosis 451
  and gene expression 459
  and LTP 444
  and neuronal function 417
  and plant turgor 423
  and protein kinase C 425
  and protein modulation 462
  oscillations 43
  see also calcium channels
Calcium channels
  and proto-oncogenes 460
  and toxins 421
  in transverse tubules (t-tubules) 128
  types of 119
  see also Ca^{2+}-dependent ion channels, dihydropyridine, voltage-dependent ion channels
Calmodulin (CaM)
  and calcineurin 117
  and cell growth 433
  EF-hand family 465
  and gene expression 433
  general 523 (BR)
  and PKC 429
Calpains 438
Calpastatin 438
CaM, see calmodulin
CaM kinase II, see Ca^{2+}/CaM-dependent protein kinase II
CAMs, see cell adhesion molecules
cAMP, see cyclic AMP
Carbocyanine dyes
  and neuronal labelling 333
  see also dil, diO
Cardiovascular control
  of affective behaviour 506
cdc genes 437
Cell adhesion molecules (CAMs) 189, 246
Cell–cell interactions
  in embryonic development 12
  and laminin receptors 248
  and neural crest migration 266
  and neuronal structure/function 189
  and ommatidial development 107, 185
  and optic nerve development 85
Cell culture
  in vertebrates 306 (BR)
Cell death
  and neurotransmitters 269
  and neurotrophic theory 253
Cell division 433
Cell growth 433
Cell lineage analysis
  in the cerebral cortex 24, 342
  in *Drosophila* ommatidia 102
  and β-galactosidase genes 21
  in neural crest 82
  in the optic tectum 25
  in the retina 22
  and retroviral markers 21
Cell–matrix interactions
  and laminin receptors 248
  and neuronal structure/function 189
Cell migration
  in cerebral cortex 342
  in neural crest 81
Cerebral cortex
  cell lineage analysis in 24, 342
  and 5-HT 315
  Ramòn y Cajal on 520 (BR)
C-fibres, see pain
Chandelier cells 28
Charybdotoxin
  and Ca^{2+} channels 421
  and K^+ channels 63
Chemotrophism 481
Chemotropism 481
Chondroitin sulphate proteoglycan, see

proteoglycans
Ciliary ganglia, chick 17
Ciliary neurotrophic factor (CNTF) 83
CNQX (6-cyano-7-nitro-quinoxaline-2,3-dione) and glutamate receptors 350, 445
CNTF, see ciliary neurotrophic factor
Confocal microscopy, see microscopy, confocal
ω-Conotoxin and Ca^{2+} channels 499
Cortex
cerebral, see cerebral cortex
somatosensory 519
Cortical blood flow regional (rCBF) 282
Creutzfeldt–Jakob disease (CJD) 168, 221
Cyclic AMP
and AChRs 19
and Ca^{2+}-dependent channels 422
and cell proliferation 435
see also second messengers
Cytochrome *c* oxidase 95
Cytoskeletal proteins
actin 468, 503
dynein 475
intermediate filaments 228
microtubules 203, 211, 238, 504
myosin 237, 465, 503
neurofilaments 228
'peripherin' 228
Cytotactin, see tenascin

D
DAG, see diacylglycerol
'Darwin II'
and neural modelling 241
Dementia
and galanin 281
Dendrites
and growth cones 238
and neuronal differentiation 203, 211
and synaptic processing 313
see also neurites
Dendrotoxin
and K^+ channels 64
2-Deoxyglucose (2-DG)
and neuronal activity 99
Depolarization
and LTP 444
Development
embryonic 24, 83, 342
and gap junctional communication 12
postnatal 99
2-DG, see 2-deoxyglucose
DHP, see dihydropyridine
Diacylglycerol (DAG) 425
Diencephalon
and cardiovascular control 506
Differentiation
in *Drosophila* eye 102, 183
glial 83
neuronal 204
see also homeobox genes
Dihydropyridine (DHP)
and Ca^{2+} channels 119, 128
DiI
in neuronal labelling 333
and neurotrophic theory 253
and retinotectal pathways 481
DiO
in neuronal labelling 333
DM-nitrophen, see caged compounds
Dopamine
and cerebral cortex 315
Down's syndrome 153, 209
Drawing 287
Dream sleep, see sleep, paradoxical
Drosophila
courtship song of 311
eye development 102, 183
D-rule
and neural modelling 244
Duchenne muscular dystrophy (DMD), see muscular dystrophy
Dynein 475
Dystrophin 235

E
Ecotropic viruses 26
EF-hand family
and Ca^{2+} 462
Electric fields
influence of on regeneration 522 (BR)
Embryology
experimental 80 (BR)
End-inhibition
in the visual cortex 293
'Event detectors' 137
Evolution
invertebrate neuronal taxonomy 170
Exocytosis
Ca^{2+}-dependent 451
Ca^{2+}-independent 451
cause of membrane fusion in 285
study of by patch-clamp technique 159
Extracellular matrix
and laminin 250
and neuronal structure/function 190

F
F-1, see GAP-43
Familial amyloidotic polyneuropathy (FAP) 88, 134, 256
FGF, see fibroblast growth factor
Fibroblast growth factor (FGF) 13
Fibronectin 190
Filopodia
and growth cones 238, 503
Flash photolysis, see caged compounds
Forebrain
reptilian 272 (BR)
c-*fos* genes 459
c-fos protein 8
Frog
developmental neurobiology of 362 (BR)

G
G proteins
and exocytosis 162
and olfactory cilia 35
and PLC activity 452
transducin 36
GABA, see γ-amino butyric acid
GABAergic neurons
calbindin in 30
identification of using plant lectins 31
molecular determinants of 28
parvalbumin in 30
and thalamus 217
in the visual cortex 28
GABAergic transmission 10 (L), 11 (L)
β-galactosidase genes
in cell lineage analysis 21
Galanin 278
GalNAc, see *N*-acetyl-glucosamine
Gap junctions
dye transfer through 12
in embryonic development 12
GAP-43
and neurite differentiation 205, 473
Gelsolin
and cytoskeleton 471
Gene expression
and Ca^{2+} 459
Gerstmann–Sträussler syndrome (GSS) 168, 221
Glial cells
and development 70
differentiation of 83
Glomeruli
olfactory 70
Glutamate receptors, see kainate, NMDA, quisqualate receptors
Glycine
and NMDA receptors 349
Growth cones
microscopical studies of 503
in neurite growth 238, 265
and neurotransmitters 265
Growth factors
CNTF 83
FGF 13
PDGF 83
TGF-β 13
GTP-γ-*S*
and exocytosis 159, 453
Guanine nucleotides
GDP-β-*S* 454
GTP-γ-*S* 159, 453

H
Handwriting 287
Headache 523 (BR)
Hearing 270 (BR)
Helper viruses 26
Heparan sulphate proteoglycan, see proteoglycans
Hippocampus
and LTP 6
and protein kinase C activity 442
Homeobox genes
and neuronal differentiation 206
and ommatidial development 107, 188
5-HT, see serotonin
6-hydroxydopamine (6-OHDA) 257 (L)
5-hydroxytryptamine (5-HT), see serotonin
Hypothalamus
and cardiovascular control 506

I
Induction
mesoderm 13
neural 13
Inositol 1,4,5-trisphosphate (IP_3)
and calcium oscillations 44
and cell growth 433
and gene expression 433
Integrins
and laminin receptors 192, 248
Interneurones
GABAergic, and thalamocortical processing 219
IP_3, see inositol 1,4,5-trisphosphate
Ixodes dammini, see Lyme disease

J
c-*jun* genes 459

K
K^+, see potassium channels, currents
Kainate (K) receptors 266
Kindling
and acetylcholine 7
in the amygdala 6
similarity of to LTP 6
Kinematics 287
Kinesin
in axonal transport 66, 475
Kuru 168, 221

L
lacZ genes
and recombinant retroviruses 22
Lambert–Eaton myasthenic syndrome (LEMS) 496
Lamellipodia 238, 503
Laminin
in extracellular matrix 190
receptors, neuronal 249
Lateral geniculate nucleus (LGN) 75, 292
LEMS, see Lambert–Eaton myasthenic syndrome
LGN, see lateral geniculate nucleus
Light
polarized 353
Linnaeus 172
Long-term potentiation (LTP) and Ca^{2+} 464

and calpain 442
in the hippocampus 6
and neuronal modelling 246, 262
similarity of to kindling 6
LTP, see long-term potentiation
Lyme disease 177
LysoPC, see lysophosphatidylcholine
Lysophosphatidylcholine (lysoPC)
and PKC 429

M

MAGs, see myelin-associated glycoproteins
Magnesium (Mg^{2+})
and NMDA receptors 349
Magnetic resonance imaging (MRI) 282
Manic-depression
molecular genetics of 46, 136
MAOB, see monoamine oxidase B
MAP1, MAP2, see microtubule-associated proteins
MARCKS, see myristoylated alanine-rich C kinase substrate
Mast cell degranulating peptide (MCDP)
and K^+ channels 65
Mast cells
and exocytosis 159
MCDP, see mast cell degranulating peptide
MDNF, see muscle-derived neurotrophic factor
Memory
associative 258
modelling 261
and neural modelling 246
working 279
N-methyl-D-aspartate (NMDA) receptors
and glycine 349
in LTP 7
1-methyl-1,2,3,6-tetrahydropyridine (MPTP)
and Parkinson's disease 49, 182 (L)
Mg^{2+}, see magnesium
MG, see myasthenia gravis
β_2-Microglobulin
and FAP 88
Microscopy
confocal 11 (L), 486
fluorescent 490
Microtubule-associated proteins
dynein 475
kinesin 66
MAP1A, B 66
MAP1C 211
MAP 2A, B 66, 203
tau 154, 203
Microtubules
and growth cones 238, 504
polarity of 203, 211
Migration
and cerebral cortex 347
Mini-columns
and neural modelling 243
Mitosis-promoting factor (MPF) 437
Monoamine oxidase B (MAOB) 49
Morphogenesis
in *Drosophila* eye 102, 183
gradients for 14
Motor units
and neural prostheses 199
Movements
goal-directed 233 (BR)
Movement detectors 297
MPF, see mitosis-promoting factor
MPTP, see 1-methyl-1,2,3,6-tetrahydropyridine
MRI, see magnetic resonance imaging
Müller glia
lineage of 24
Multiple sclerosis 272 (BR)
Muscle-derived neurotrophic factor (MDNF)
and neurotrophic theory 252
Muscle spindles 93 (L)
Muscular dysgenesis
and Ca^{2+} channels 129
Muscular dystrophy
Becker (BMD) 235
Duchenne (DMD) 235, 307 (BR)
Myasthenia gravis (MG) 496
Myelin
in the CNS 2
in the optic nerve 83
in the PNS 2
Myelin-associated glycoproteins (MAGs) 31, 190
Myelin proteins
and neurite growth inhibition 1
Myosin 237, 465, 503
Myristoylated alanine-rich C kinase substrate (MARCKS)
and PKC 431

N

Na^+/K^+-ATPase 94
Na^+, K^+-pump 361 (BR)
Nasal glands 37
Navigation
insect 353
N-cadherin (Ncal-CAM)
cell adhesion molecules 190
and neuronal development 275
Ncal-CAM, see N-cadherin
N-CAM
cell adhesion molecules 190
and immunological probes 31
and neurite growth inhibition 3
Neocortex 271 (BR)
Nerve growth factor (NGF)
and neurotrophic theory 252
Neural crest
differentiation of 81
evolutionary aspects of 38 (BR)
historical perspective 359 (BR)
Neural modelling
importance of 240
and memory 246
Neurites
differentiation of 204, 211
and neurotransmitters 265
outgrowth of 1, 238, 265, 505
Neuritic plaques
and AD 152
Neurochemistry
invertebrate 122 (BR)
Neurofibromatosis
molecular genetics of 134
Neurohormones
invertebrate 273 (BR)
Neuromodulation 494 (L)
Neuronal form 122 (BR)
Neuronal grafts
foetal nigral 257 (L)
Neuronal labelling
with DiI, DiO 333
Neuronal microenvironment 163 (BR)
Neuronal plasticity 211, 265
Neuropil 71
Neuropsychiatric disorders
molecular genetics of 46, 130
Neurotransmitters
monoamine 315
and neuronal outgrowth 265
see also ACh, GABA, noradrenaline, serotonin, somatostatin, VIP,
Neurotrophic factors
and glial differentiation 84
MDNF 253
NGF 252
Neurotrophic theory 252, 494 (L), 495 (L)
NGF, see nerve growth factor
Nitr-5, see caged compounds
NMDA receptors, see *N*-methyl-D-aspartate receptors
Nociceptors, see pain
Nomenclature
basal forebrain 483
taxonomical 170
Noradrenaline
and cerebral cortex 315
and LTP 7
Norepinephrine, see noradrenaline
Noxiustoxin
and K^+ channels 63

O

Obituary
H. G. J. M. Kuypers 485
Oculomotor control
and eye movements 360 (BR)
Odorant-binding protein 35
Odorants
